DEUTSCHES ZENTRUM FÜR
HERZ-KREISLAUF-FORSCHUNG E.V.

Sequence framework

Daniel Mackner

Institute of Biomedical Imaging
Graz University of Technology

Open MR days - DACH + Nordic ISMRM

September 14, 2025

Programe

- BART introduction

Martin Uecker

Hands-on: How to use BART

- **Sequence framework**

Daniel Mackner

Hands-on: How to create a sequence & scanning

- MRI reconstruction

Vitali Telezki

Hands-on: Subspace-constrained model-based T1 mapping

Motivation

BART

Motivation

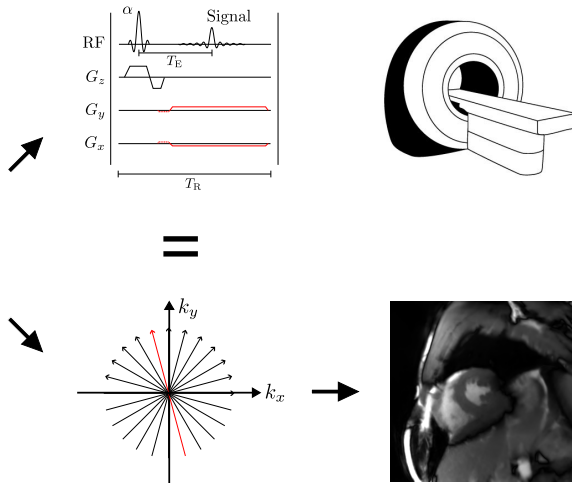

=?

BART

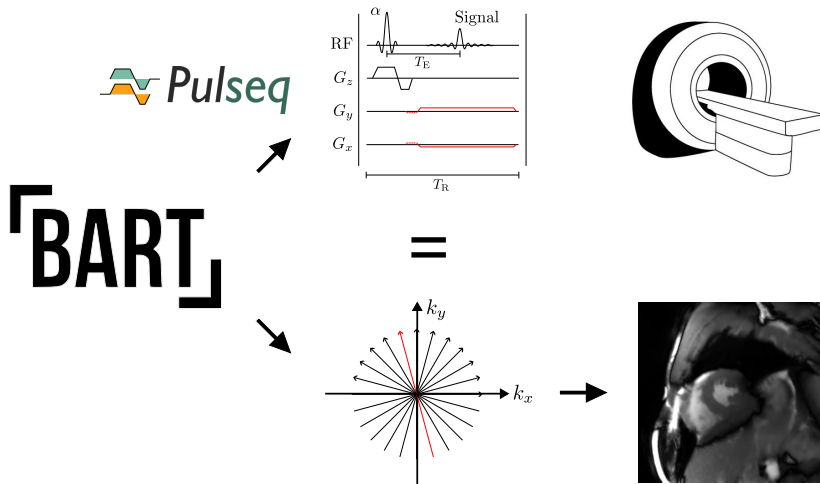

Motivation

「BART」

Motivation

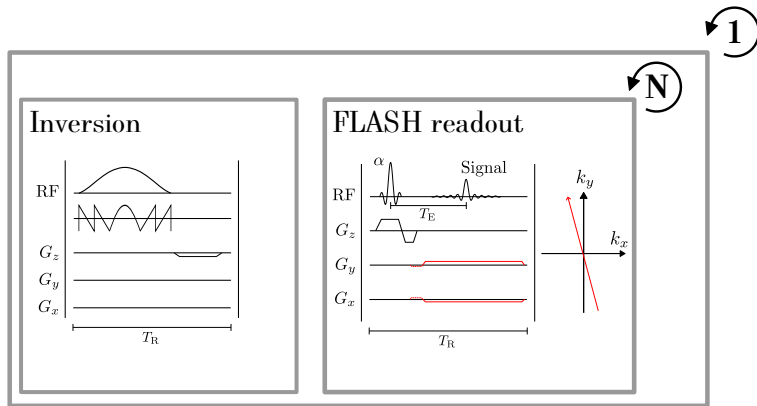

Outline

- Motivation
- **What do we need?**
- Interface to the scanner?
- How can we create a sequence?

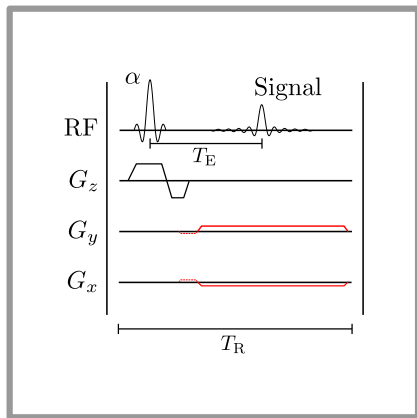

IR-FLASH

Sequence Framework 1/4: Looping

Sequence Framework 2/4: Blocks

- RF pulse(s)
- ADC(s)
- gradients
- timing

Sequence Framework 3/4: Events and RF pulse shapes

- events: start / mid / end time

GRAD

- amplitude
phase/read/slice - axis

ADC

- frequency / phase
- dwell time

RF

- frequency / phase
- samples
- pulse shape

Sequence Framework 4/4: Parameters

- TE / TR
- Dwell time / base resolution
- RF pulse shape / duration / flip angle / BWTP
- FOV / slice thickness
- Slice position / orientation

- Inversion pulse (type) / TI

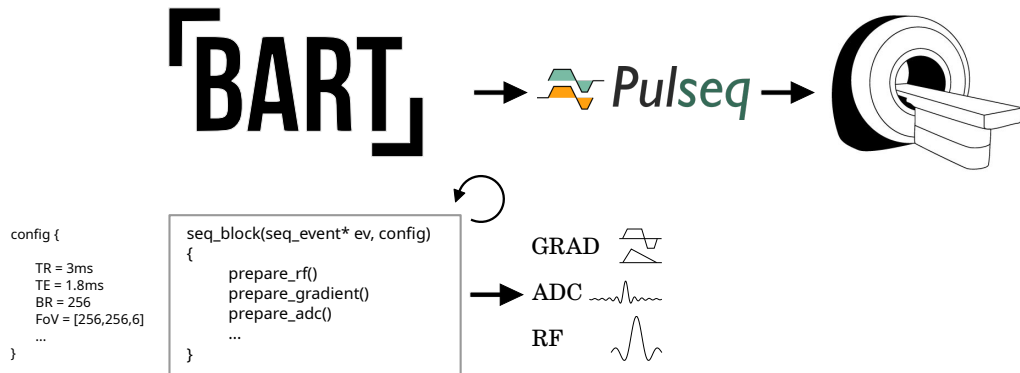

- System limits (max. gradients, slew rate, etc.)

- Looping dimensions (e.g. spokes, slices, frames, inversions, etc.)

Outline

- Motivation
- What do we need?
- **Interface to the scanner?**
- How can we create a sequence?

BART sequence framework

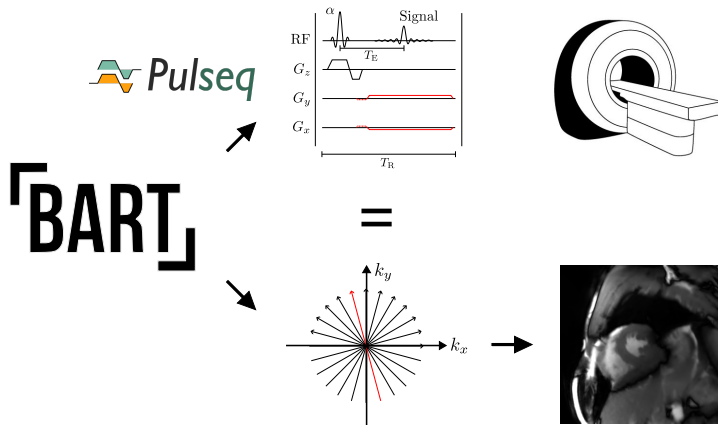

- BART: parameters / events and pulse shapes / blocks / looping
- Scanner: event and pulse shape interpretation (pulseseq)

BART sequence framework

- BART: parameters / events and pulse shapes / blocks / looping
- Scanner: event and pulse shape interpretation (pulseseq/vendor)
- User interface: parameters

BART sequence framework

- Sequence parameters
 - open-source sequence
 - reconstruction parameters (e.g. trajectory)

Outline

- Motivation
- What do we need?
- Interface to the scanner?
- **How can we create a sequence?**
